

TREES FOR ALL

Author: Nanja Segers - nsegers@senseanywhere.com

ENVIRONMENTAL CARE

SenseAnywhere aims to achieve ISO 14001 certification this year. ISO 14001 is the internationally accepted standard for Environmental Management. Climate change is an important issue at the moment and as a company, we want to go the extra mile to ensure a more sustainable future.

CO2 EMISSIONS

SenseAnywhere has a subscription to the Environmental Barometer allowing us to fill in all kinds of data about our company. The CO2 graph shows that SenseAnywhere emitted 20.3 tonnes of CO2 last year, most of which came from goods transport (11 tonnes of CO2) and commuting (7.5 tonnes of CO2).

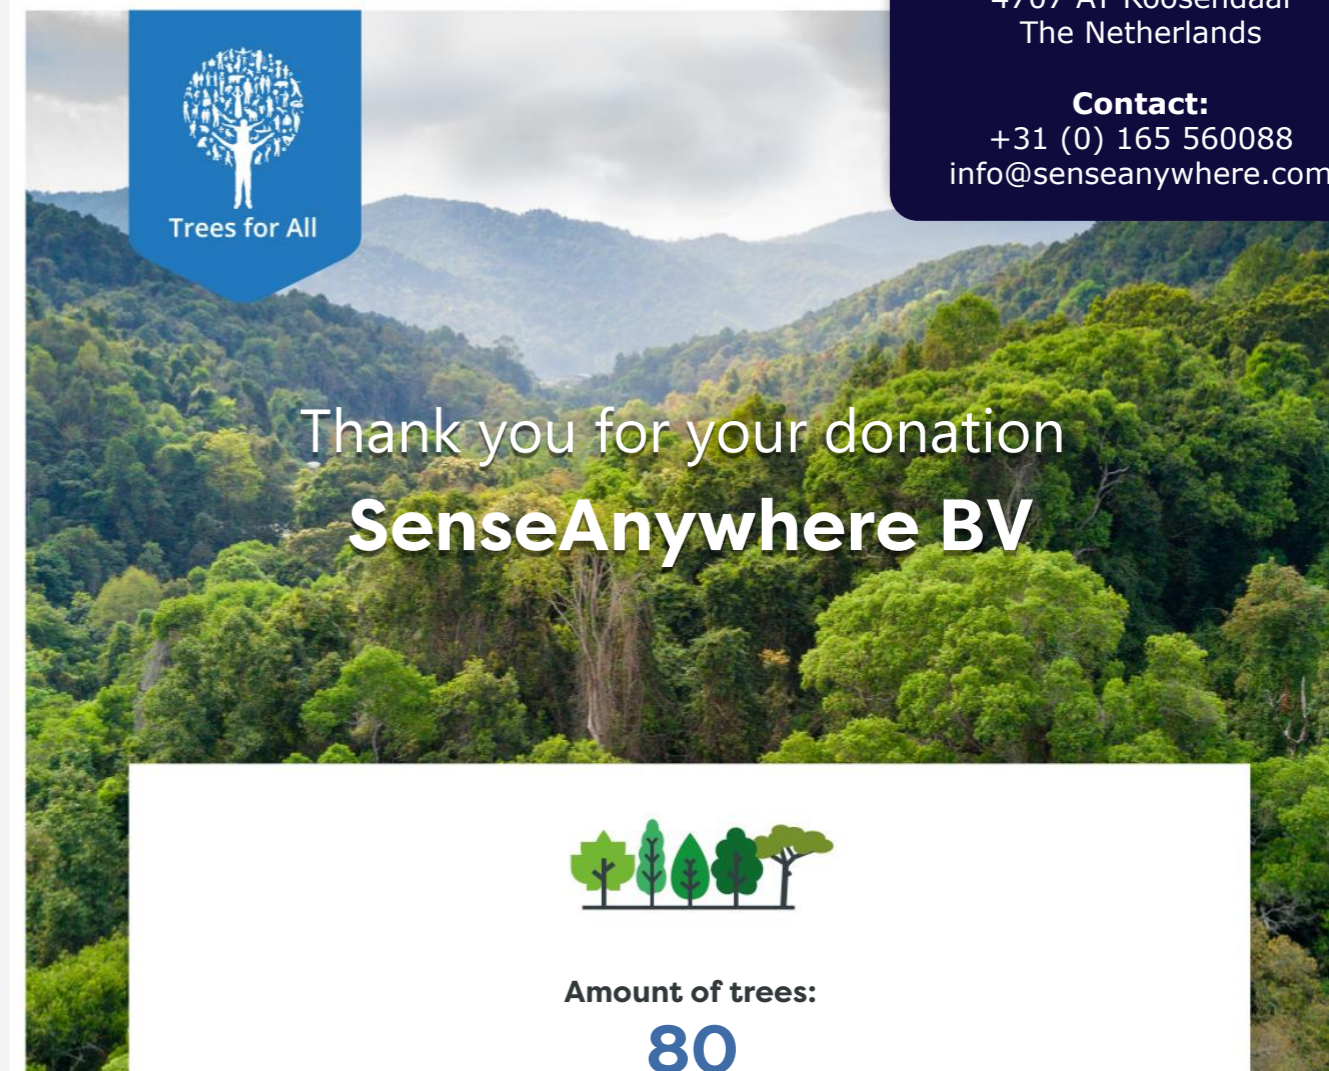

80 TREES

To compensate for this, SenseAnywhere is participating in a great initiative, about which you can read more at <https://treesforall.nl>. To combat climate change, the world needs more forest. SenseAnywhere is planting 80 trees in the Netherlands and Madagascar to compensate for all its CO2 emissions last year, plus a little extra. We have opted for a climate-resistant forest, which means creating new forests and restoring diseased ones.

ORANGE IS THE NEW GREEN

To learn more about our sustainability, check out our Whitepaper Orange is the New Green. What sustainable initiatives does your organisation take?

Thank you for your donation
SenseAnywhere BV

Amount of trees:
80

Thanks to your contribution, we can plant forests in the Netherlands and Madagascar and raise people's awareness of the importance of trees. So together we ensure a better climate, more biodiversity and healthier living conditions for everyone!
